Medical protection

Easy reference to premium adjustment rates

Premium adjustment rates brochure

Introduction

At AXA, we are committed to providing clear and transparent information to our customers. The Monetary Authority of Macao are also placing increasing emphasis on treating customers fairly, including a requirement for insurers to publish a new metric - the historical premium adjustment rates for the last 5 years. This requirement applies to medical insurance products which will reimburse the charges or expenses incurred for medical services, treatments, procedures, supplies, medications, or other medical cares provided to the insured.

This brochure provides easy-to-use guidance on the essential principles and information on the premium adjustment rates and covers:

1. How the premium adjustment rates are calculated
2. The premium adjustment rate tables for the last 5 years for AXA's medical insurance products*

AXA follows the calculation methodology and disclosure format prescribed by the Monetary Authority of Macao.

For any further queries, please contact your financial consultant.

*Please note that the products without premium increment for the last 5 years are not stated in the premium adjustment rate tables.

1. How the premium increase rates are calculated

The initial premium is based on the age of the insured at the time of policy issuance and other factors including but not limited to gender, smoking status, risk class, and principal country of residence of the insured and the benefit level of your policy. Premium rates are not guaranteed and may be adjusted by AXA at any of the policy anniversaries if necessary. We consider factors including but not limited to (i) AXA's claims and policy persistency experience and (ii) expected claim outgo from all policies under the relevant medical insurance products in future years, reflecting the impact of medical trend, medical cost inflation and product feature revisions.

2. The premium increase rate tables for AXA's medical insurance products

- For Cancer Therapy, Cancer Therapy Insurance II, Cancer And Stroke Therapy Insurance, Smart Medimoney, Pink Medical Insurance Plan, HealthSure Hospital Income Insurance, WiseProtect Pro Medical Insurance Plan, CareForAll Hospital Cash Plan and CareForAll Hospital Cash – First Year \$1 Supplement, the premium rates have never been changed and therefore will be omitted in the following tables.
- For Healthcare, HealthPak and Smart Medicare, the premium rates have been no changed for the last 5 years and are not stated in the following premium adjustment rate tables.

Premium Increment % in 2021

For Global Elite Health Plan and Global Elite II Health Plan, the premium increment % was 6.0% for all ages.

For other medical insurance products, there was no premium increment.

Premium Increment % in 2022

The premium adjustment rates for the relevant medical insurance products are listed below:
